TO GROW IN WISDOM, AGE AND GRACE

Welcome Back To The Second Term

Welcome back to the 2nd school term of 2018 academic calendar. I trust everyone has had a wonderful break with lots of rest and opportunities to enjoy numerous activities with family and friends. We are looking forward to an exciting, productive and successful term of the year. Our consistent effort to support the students' efforts, academically, socially and spiritually throughout the year, will ensure optimum success for all.

Teachers we truly care for the students and let them know that determination is a key part of school life. Without hard work and determination, they will not achieve. Remind them to remain focused and determined and do not tire by continuing pushing them to reach their peak potential.

Teachers, I know this is a team effort. We work to make a difference in the lives of every student we meet. Often, the life lessons we teach are not realized until the students are ready to learn them -- years after they have left Our Lady of Nazareth.

Just before closing the school – the last week of the term - we had some important activities among them class eight boys talk by the chaplain and class eight teachers. Then on the 4th of April the class eights had a tour to the meteorological department at Nairobi in the morning and a visit to the national assembly and the senate buildings after lunch. On 5th, a Thursday there was General annual meeting which was followed by the closing of the school.

Staff outing

Our school's teaching and administrative staffs shoulder the combined responsibility of shaping up the pupils into formidable individuals. Teachers take the immense care in preparing for classes, setting up and correcting exams not forgetting the daily role call, lesson plans etc. The administration, the offices and the assisting staff help in providing the best learning atmosphere for our pupils. Many of them skillfully balance family and work through their careful division of labor. The teachers came up with an outing proposition to divert themselves from the rigors of daily life. This was on 6th just to socialize and enjoy meals together.

During the holiday, the school was full of activities. Mentorship program was the main activity for our former students who are in secondary school. Madam Benter and Mr. Lucky did the mentoring. The Library was also opened for both our primary and secondary students. It was ever full.

Looking forward for a studious second term.

Meteorological visit

Pupils listen attentively

Seeing is believing

The were curious

The weather was favourable

Releasing a ballon

He likes his work

Parliament visit

The National Assembly

There was no sitting

Queeing to get in

The teachers also sat

Smiles were obvious
