

The Marianists

BROTHER LOUIS T. MASON

60 years of profession

The thought of the importance of the educational aspect in life led me to consider the Marianist religious order as my vocation to the brotherhood. Since we are the family of Mary, we support and pray for the success of our individual ministries, first and foremost to formally educate the children entrusted to our care.

My personal vocation led me to become a teacher of the sciences, especially physics. Complementing this experience, I also taught mathematics — the advanced classes in high school — as well as college mathematics.

The Mother of the Word lovingly brings me to desire my dying, wearing the habit of the Marianists.
