

High School Transformation Project Fact Sheet

Project Cost:

\$66 million

Expansion Size: 4.8 acres

Total for all construction packages: 5.6 acres

Project Start Date:

September 30, 2026

Estimated Completion Date:

August, 2030

DESIGN FIRM

CannonDesign, an internationally-recognized architecture and engineering firm known for designing innovative educational environments

CONSTRUCTION FIRM

Athletic Facilities / Bridge / Welcome Center

MATT Construction, a Southern California builder with extensive experience delivering educational and institutional projects

CONSTRUCTION FIRM

Advancement and Alumni Center

Dome Construction, California-based builder with a 50-year history of delivering educational and institutional projects.

Key Features:

Baseball and Athletic Fields – a regulation-size baseball field set within a distinctive “below-grade” stadium with grandstand seating, concessions and adjacent parking. Designed with a synthetic turf playing surface, the field will serve as the home of Chaminade baseball while also accommodating practices for soccer, lacrosse, field hockey and other field sports.

Pedestrian Bridge – connecting Chaminade’s North and South campuses and parking facilities across Saticoy Street, providing a safe, seamless pathway that leads directly to the Fritz B. Burns Foundation Welcome and Student Services Center.

Fritz B. Burns Foundation Welcome and Student Services Center

– will house the administration, counseling, student support services, a wellness center, library, classrooms and meeting spaces in one centralized location.

Student Quad - new college-style student quad, creating a flexible outdoor space for learning, student activities and campus events.

Advancement and Alumni Center – the former Marianist Community House is being renovated to serve as an event space for the Chaminade community and an office space for the Advancement team.

Chaminade College Preparatory

As an outgrowth of their ministry to expand their educational mission in Southern California, the Marianists founded Chaminade high school for boys in Cheviot Hills in the fall of 1952. In 1961, the Marianists relocated Chaminade to West Hills, and in 1969, expanded their educational program to include a middle school on our Chatsworth campus.

Since 1952, Chaminade has been a place where students are known, challenged, and inspired to become their best selves. Rooted in our Catholic and Marianist traditions, we guide young people to grow in faith, pursue academic excellence, and develop the confidence and character to lead lives of purpose and compassion.

Today, Chaminade is one school with two campuses: our middle school (grades 6–8) with 600 students in Chatsworth and our high school (grades 9–12) with 1200 students in West Hills. Chaminade has a president-principal leadership structure with President Robert S. Webb in his 13th year as president and 27th year at Chaminade, and High School Principal Luis Guerra and Middle School Principal Ryan Halverson. Our graduates join a global network of more than 13,000 alumni who continue to carry our mission into the world in meaningful and impactful ways.
